(54) SCREEN SAVER FOR
ELECTRONIC STILL
CAMERA

(57) Abstract:

PROBLEM TO BE SOLVED: To realize a screen save mode where no screen is baked for the electronic still camera.

SOLUTION: In the case that the electronic still camera is driven by a commercial power supply (S9), when the user does not operate the camera for a prescribed time (S8), a screen save mode is set (S12). In the screen save mode, an optional image, preferably, a photographed image is displayed on a display device and slides selected each 5-second or moving thumbnails where thumbnail images with a reduced size are moved are used for the display.
